PROFILE

Full Stack Web Developer with the ability to execute scalable, modularizable projects that facilitate teamwork. I am a professional engineer with more than 6 years of experience in the business sector, now redirecting my path towards the field of technology, a sector that I am passionate about and in which I highlight the potential to improve the lives of others.

ACEDEMIC PROJECTS

WEB APP "INVITE TO PLAY" | BOOTCAMP HENRY (02/2022)

- Project developed in a group of 8 people (SCRUM). Sports Web application, which allows to organize and manage sporting events. By linking players, matches and sports centers according to their geolocation, the user can register for free and organize matches with his friends or participate in others organized by other people.
- Used tech: #React | #Redux | #Express | #Sequelize | #Postgres |#Nodejs | #CSS | #Figma | #Firebase

WEB APP "FOOD & RECIPES" | BOOTCAMP HENRY (12/2021) [LINK]

- Web application (SPA) developed with ReactJS and Redux in the Front to manage states and the back developed with NodeJs, Express, PostgreSQL, and Sequelize, for the administration of the database, server, routes, and asynchronous integration with an external API (Spoonacular score).
- Dynamic pagination with React, filters, sorting, and detail of dishes. Allowing users to query through different filters and create recipes to be saved in the database.

WEB APP "VIDEOGAMES" | BOOTCAMP HENRY (11 /2021)

- Web Application (SPA) with Video Games theme, consuming and displaying data from the external api RAWG.
- Functionalities: Videogame Search, Filters and Sorting. Creation of new videogames.
- Used tech: #React | #Redux | #Express | #Sequelize | #Postgres |#Nodejs | #CSS Puro.
